Type VGM706C

Peerless Pump Co. BSE-2
VGK-1090

Every office building, school, hotel, factory and warehouse has an HVAC system. The demands of this industry require reliable sealing solutions delivered in a timely manner.

U.S. SEAL MFG. stocks both the seals and pump repair kits needed for your HVAC equipment, be it a cooling water pump, fire pump, condenser or hot water pump, boiler or wastewater pump.

Mechanical seals used in HVAC equipment must be tailored to your customer's unique building maintenance needs. Our seals have the right combination of materials and include Silicon and Tungsten Carbide faces and fluoroelastomers.

Call us for seal recommendations and provide your customer with increased efficiency of their heating and cooling systems.

U.S. SEAL MFG. – quality replacement mechanical seals for Armstrong Pumps, Aurora®, Bell & Gossett, Flowserve Corp., Goulds Pumps, Grundfos CBS, Inc., Peerless Pump, Taco® and many others.
